

Sanitary expertise
& water friendly

SIAMP

A SPECIALIST AT YOUR SERVICE FOR 70 YEARS.

Founded in 1947, SIAMP designs and manufactures innovative sanitary products for the bathroom environment, whether it's a commercial project or the renovation of a domestic bathroom, SIAMP has the solution.

Recognised by leading ceramic manufacturers throughout the world, SIAMP is the brand selected to equip their cisterns for the new market.

SIAMP began manufacturing toilet seats in Monaco, today with 5 production plants around the world, we produce a substantial range of sanitary equipment including, toilet seats, flushing mechanisms, inlet valves, WC wall frames, concealed cisterns and much more.

Through 8 subsidiaries and hundreds of valued distributors we are able to make our wide range of products available, globally, to millions of consumers.

To remain a sanitary specialist in this evolving market, we invest in new technologies to develop new products, and perfect the efficiency of manufacturing.

Our aim is to meet the expectations of the consumer with high quality, innovative, eco-efficient solutions that guarantee hygiene, comfort and responsible management of water.

Understanding the importance of water sustainability, SIAMP continue to develop technical solutions to protect this resource for future generations.

SIAMP is regularly at the origin of innovations recognised by a large number of international patents.

OUR SOLUTIONS

SIAMP innovations provide solutions and technological advantages to these important areas

- **Water saving**
- **Easy installation**
- **Acoustic comfort**
- **Hygiene**
- **Solutions for less abled**

QUALITY

Our approach to quality starts at the design stage and is followed through the manufacturing and distribution process.

All SIAMP products are subjected to rigorous and intense tests, using our own, and third party test laboratories. We regularly test our products in extreme conditions.

Our WC wall frames are subjected to loads of 400kg and our flushing systems to 200,000 repetitive performance and endurance tests.

WC wall frames, concealed cisterns and flushing systems are guaranteed for 10 years.

CERTIFICATION

All our products are designed and developed in order to meet the most demanding UK and international standards, along with voluntary certification schemes.

We are committed to manufacturing high quality products and employing best practices, in order to guarantee constant quality levels and product performance.

Our flushing solutions are WRAS approved.

Our cisterns are compliant with  EN 14055

Our WC packs are compliant with  EN 997 Type 2 &  EN 14055 Type 2

CUSTOMER SERVICE / SPARE PARTS

We pride ourselves on providing outstanding customer service, including presale technical advice and ongoing support throughout the lifecycle of the product.

Furthermore all spare parts are available from our Manchester based distribution centre.

INNOVATION

Serving our customers with innovation has been a driving force of SIAMP for 70 years.

SIAMP is the origin of many innovations in the world of toilets and puts all its resource into designing and manufacturing innovative and eco-efficient solutions that guarantee hygiene, comfort and responsible management of water.

These innovations are the subject of technical patents all over the world.

SUSTAINABILITY

SIAMP adopts an environmental approach that is implemented in all areas from design to distribution.

This approach includes, in particular, the sustainability requirements of our products but also the development of solutions and systems that promote water saving.

SUPPORTING WATER EFFICIENCY

Understanding the importance of water sustainability, SIAMP continue to develop technical solutions to protect this resource for future generations.

We are proud to support the following water saving initiatives.

WATER LABEL

The European Water Label is a voluntary scheme adopted by manufacturers to promote the water efficiency of their products. The scheme enables customers, to easily compare the amount of water different products use and make informed decisions that will save them water and money. Throughout the brochure we use the below labels to indicate the water efficiency of our products as outlined by the scheme.

www.europeanwaterlabel.eu

BREEAM

BREEAM is an international scheme that provides independent third party certification for the assessment of the sustainability performance of individual buildings, communities and infrastructure projects.

BREEAM WAT 01 Water consumption - assessment aims to reduce the consumption of potable water for sanitary use in new buildings from all sources through the use of water efficient components and water recycling systems.

www.breeam.org

PART G

Approved Document G of The Buildings Regulation outlines the requirement for water efficiency of new dwellings. The potential consumption of wholesome water must not exceed more than 125 litres per person per day.

WRAS

WRAS contributes to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Byelaws in Scotland. Products approved by the scheme are deemed to comply with the requirements of the Water Supply (Water Fittings) Regulations 1999 and amendments.

Throughout the brochure we use the WRAS logo to indicate products which are WRAS approved.

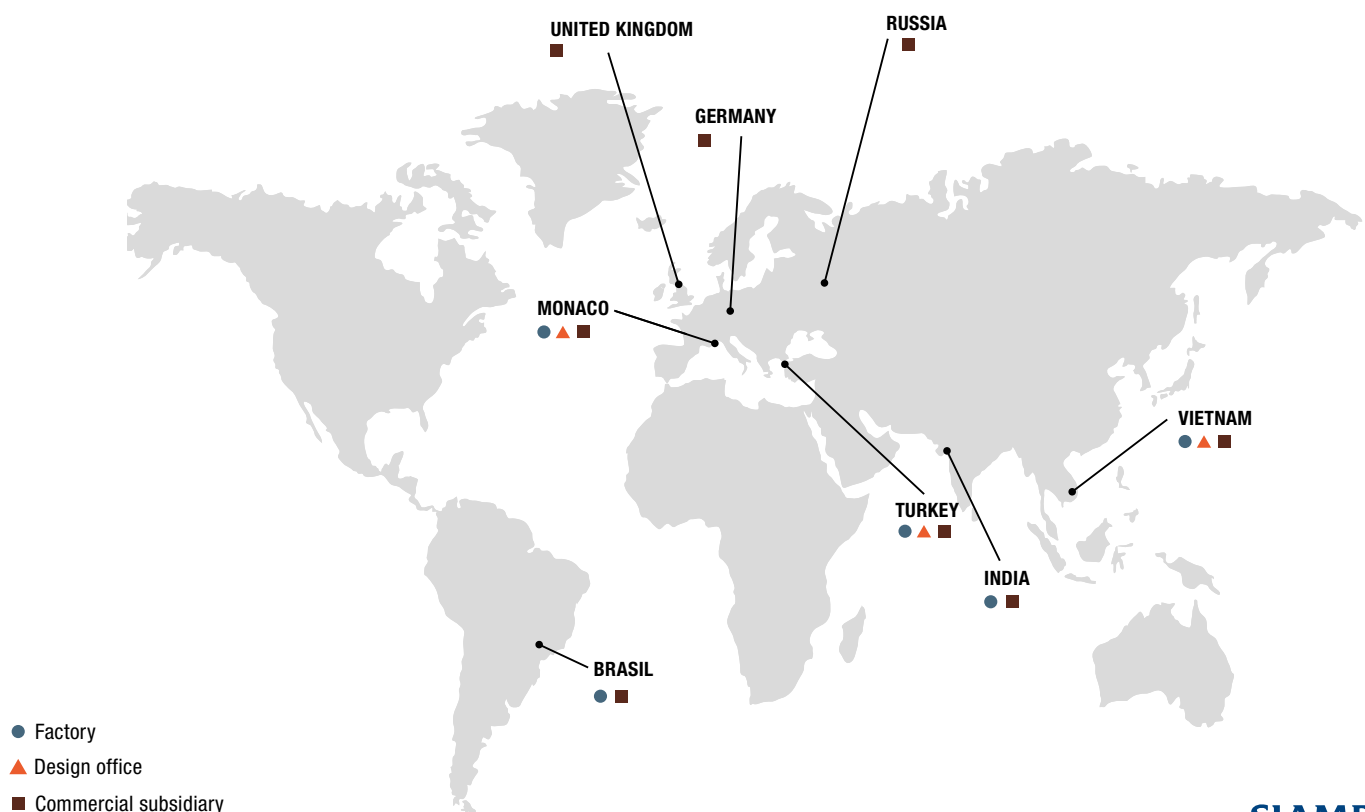

Visit www.wras.co.uk/directory and search for SIAMP to access the full listing.

INTERNATIONAL PRESENCE

In addition to its headquarters and a factory based in Monaco, SIAMP is present throughout Europe and worldwide.

Our products are present today on 5 continents through 8 subsidiaries, 5 production plants and hundreds of distributors for the benefit of millions of users. Our goal is to be closer to our customers and users to support them in their development and projects.

WALL FRAMES INTRODUCTION

ROBUST

Our WC wall frames are tested to withstand a load of 400kg

Our washbasin wall frames are tested to withstand a load of 150kg

DESIGN

A wide range of decorative flush plates, with designs and finishes to suit any bathroom

SPECIALIST

As a flushing expert, our cisterns are equipped with our own range of flush and inlet valves.

All our solutions are endurance tested to 200,000 cycles for assured reliability, meeting the most demanding worldwide certifications.

WATER SAVING

Our WC frames include delayed action inlet valves*.

The dual flush volume is pre-set at 6/4 litres and can be easily adjusted on site to 4/2.6 litres when used with a compatible wall hung pan.

*With exception of BCM Intrasilim

100% TESTED

Every cistern is tested for leaks during the production process. The cisterns are insulated to reduce the risk of condensation and also help reduce noise.

MAINTENANCE

The flush plate serves as the access point for easy maintenance.

Spare parts are readily available.

CORNER SOLUTION

We offer solutions for corner installation, or installation on an angle.

Two possible installations with the optional corner installation kit.

- 90° corner installation
- up to 30° angle on a single wall

LOW HEIGHT SOLUTIONS

Ideal for under windows, in cloakrooms or low height tiled solutions in conjunction with a semi-recessed or wall mounted basin.

WALL FRAME SOLUTIONS

WC FRAMES

SIAMP offers a wide range of wall frames that can safely support wall hung WCs.

INGENIO

Complete with fast fix solutions INGENIO makes for a simple installation.

TALL WALL FRAMES

BCM350 and BCU350 are tall and narrow, offering a compact installation and great resistance.

BCM INTRASLIM can fit in a cavity of only 123mm for narrow depth installation.

LOW HEIGHT FRAMES

Suitable for installation below windows, in cloakrooms or low height tiled solutions in conjunction with a semi-recessed or wall mounted basin.

The BCM 790 features a front flush plate and the BCM 800 has a top flush plate

WASHBASIN AND BIDET FRAMES:

The BLM400 allows support for a wall hung washbasin. When combined with a wall hung WC, it helps create modern bathroom styling.

The SCU350 supports either a wall hung bidet or can be used with a wall hung WC, in conjunction with a concealed cistern.

NEW WC FRAME

INGENIO

WALL FIXING

Wall fixing structure transfers the force applied to the WC bowl through a load bearing wall. The unique wall fixation at the WC bowl level offers greater force transfer and higher resistance.

Narrow frame makes in perfect for compact installations and greater resistance.

SELF SUPPORTING

Self supporting structure transfers the force applied to the WC bowl through the supporting floor.

Narrow frame makes in perfect for compact installations and greater resistance.

PRODUCT FEATURES INGENIO

ULTRA QUIET

The first WC wall frame equipped with an ultra quiet inlet valve, acoustic levels of only 9 dB.

WATER SAVING

The box that surrounds the float of Quieto has 2 functions:

- the first is to delay the inlet valve from re-filling the cistern until the flush valve has closed. Saving water from being wasted during the flushing cycle.

- the second is to maintain a consistent volume of water entering the cistern. As the cistern refills with speed, the water spills over into the box, rapidly lifting the float for a quick reliable shut off.

SECURE

The connection of the inlet valve to the water supply is made inside the cistern. A specially designed curved hose with built-in isolation valve means there is only a single connection to the water supply, reducing the number of joints where a leak could take place.

In the most unlikely event a leak occurs from this connection it will be contained within the cistern, the water will pass through the internal offering double security against leaks.

The connection of the hose to the inlet valve is done by means of a flat seal and an o-ring which sits internally of the tail, offering a double seal for further leak prevention.

Secure installation:
Built-in isolation valve

INSTALLATION WITHOUT EFFORT

Our new 3 in 1 nut allows the WC to be fastened with one single fixing, reducing the time and effort taken when compared to a traditional fixing with separate washers & nuts.

INSTALLATION READY

Height and depth adjustments are made simple with our fast fix solutions, ready for first fix installation in an instant.

- feet are supplied in the installation position
- self-braking vertical adjustment for precise height setting
- built-in bullseye spirit level
- Snap & click, fast fixing mounting rods

VERSATILE WATER CONNECTION

Water connection can be made either from the left or right.

The curved hose provides flexibility in the event the water supply pipe is made too long or too short, the isolation valve can be detached from its fixed position to make the connection.

MAXIMUM SITE PROTECTION

The cistern is protected against intrusion of foreign bodies by offering only few openings. The crucial openings are protected during the first and second fix stages by rigid protection shrouds

FAST, PRECISE INSTALLATION

Lettered guidance = **Simple adjustment** of the fixation rods

WATER CONTROL

The built-in isolation valve is accessible by removing only the flush plate. Time saving when connecting or isolating the water supply.

EASY MAINTENANCE

Once installed **INGENIO** is easy to maintain. No tools required. Access to all internal components is made through the wide opening behind the flush plate or through the rear access panel.

Both the flush valve and inlet valve can be removed from the cistern independently of each other.

Spare diaphragm and flush valve seal supplied

QR code provides immediate access to the user's manual.

EXTENDED FLUSH PLATE FIXING SCREWS

- For use with BCM350, BCU350, BCM790
- Extension to be used when cladding void is between 100mm-250mm.
- Length: 250 mm

M10 TOP CORNER MOUNTING BRACKETS

M12 BOTTOM CORNER MOUNTING BRACKETS

WALL FRAME CORNER INSTALLATION KIT

Two possible installations with the optional corner installation kit.

- 90° corner installation
- 30° angle installation on a single wall
- Suitable for all SIAMP wall frames
- M10 top corner mounting brackets can be installed on wall fixing & self-supporting frames
- M12 bottom corner mounting brackets are for use with wall fixing frames.

CONCEALED CISTERNS

Intended for concealed installations for back to wall or wall hung WC bowls.

INSTALLATION

BEHIND CLADDING

Intraslim B is the product for this type of installation as the flush plate acts as an access panel that will allow for easy maintenance.

Intra Pneumatic allows for remote flushing up to 2m away, the cistern can be reversed 180° for installation in commercial dry risers, for ease of maintenance access.

FURNITURE INSTALLATION

Intra cable has been the choice of bathroom furniture manufacturers for many years, with it's compact dimensions, pre-assembled fittings, adjustable flushpipe and access panel for easy maintenance, Intra is the ideal solution.

TECHNICAL EQUIPMENT

Chosen by many global bathroom brands to equip their cisterns, the SIAMP range of inlet valves and flush valves offers quality and durability, guaranteed by WRAS and many other international standards.

Made with premium and recyclable raw materials, our products are continually tested and certified with manufacturing and product sustainability in mind, meaning SIAMP can offer a 10 year guarantee.

Expectations of comfort (quiet, ease of operation, simple to install) and water saving has led to the development of innovative solutions covered by numerous international patents.

Water saving

150l
per person

WC FLUSHING
up to
22%

The average UK household consumes **150 litres of water per person, per day.**

22% of this consumption is associated to flushing the WC.

Our range of delayed action inlet valves contribute to saving water with two functions.

- **the first is to delay the inlet valve from re-filling the cistern until the flush valve has closed.**

Saving water from being wasted during the flushing cycle.

- **the second is to maintain a consistent volume of water entering the cistern.**

As the cistern refills with speed, the water spills over into the box, rapidly lifting the float for a quick, reliable shut off.

COMPACT 100 DELAYED ACTION

Water saving

Save up to 3L per day *

- **Delayed action**
- Compact body
- **Low pressure**
- Quiet fill
- Anti-backflow
- **1/2" Plastic tail**
- Pressure range 0.1-10 bars

TOILET SEATS

THE VARIOUS MATERIALS OF OUR TOILET SEATS:

- **THERMOSET:**

Heavy duty, manufactured with high quality antibacterial and scratch-resistant materials.

- **THERMOPLASTIC:**

Economical, hard wearing and made with recyclable material.

- **COMPOSITE WOOD:**

The most robust material, dedicated to luxury products, offering a high quality finish.

- **MDF:**

Medium-density fibreboard, with the aesthetics and warmth of wood.

HINGE OPTIONS:

- **PREMIUM:**

Quick fitting, soft close and detachable. Designed for both comfort and hygiene.

- **CLASSIC:**

Products intended for intensive use, suitable for commercial use.

- **BAR HINGE:**

Solid and durable
